Ellipse IPL Treatments

Ellipse Hair Removal

The Ellipse Superlight (IPL) system is a safe and effective treatment to remove unwanted hair from all areas of the body. The revolutionary process uses 'Intense Pulsed Light', which is absorbed by the hair pigment (melanin) to disable the follicle. Virtually painless, and clinically proven to reduce hair growth by up to 80%.

Ellipse Skin Rejuvenation

Reverse the signs of ageing, sun exposure, smoking, poor diet and stress accumulated over the years to reveal a radiant

complexion beneath. Treatments are most effective in people with light skin, who are not sun-tanned at the time of the treatment. A full face takes approximately 30 minutes, and you should expect a total of 1-3 treatments. This is a very dramatic and exclusive treatment. A consultation is required.

Ellipse Acne Treatment

Acne can be a disfiguring and severely distressing condition, which affects people of all ages. Now, Ellipse IPL can restrict the oil production that leads to acne, before it starts. Typically treatments should be carried out once every 3 weeks for 4 treatments. Each treatment takes approximately 20 minutes.

Ellipse Vascular Lesions, Thread Veins & Spider Vein Removal

Reduces vascular lesions such as broken capillaries, diffused redness, port wine stains and thread veins. Treatment is most effective on light skin, and the number of treatments is dependent on the anatomic site and on the severity of the lesion. In general 1-4 treatments are to be expected, with an interval of 1-3 months.

A consultation and patch test is compulsory before any Ellipse treatment can commence. Consultations and patch test are free of charge.
